3. Notes

Please put any important notes here:

Which specific topics are you most interested in learning?

Please acknowledge the items below, and send the signed form to msivic@structures.aero

- All attendees should bring their own laptops for the training class. The software and a license will be provided at the start of the class. If you don't have a laptop to bring, please contact Marty Sivic (msivic@structures.aero) as SDA can provide a limited number of laptops.
- If you do not already have the latest version of Femap installed on your laptop, please ensure you have admin rights on the machine to install software. We will provide the installer and license to use for the duration of the class. Additionally, the installer can be provided prior to the class for installation upon request.
- All training classes are tentative until we register a minimum number of attendees. Marty Sivic will e-mail all attendees when the class is confirmed. Please do not book travel arrangements until this time, as classes may be cancelled or postponed.
